CABS - Solidarity: a self-image of Europe

As we started this project with our partners, no one could imagine that the coronavirus pandemic would arise so suddenly. All of us had to support the consequences of the disease and we still do.

But CABS partnership demonstrated what solidarity in Europe is. During all that time of confinement each team kept a close contact to the others, followed closely the situation in teams 'countries and shared comforting and cheering clips or news.

It is when times are difficult that solidarity is best demonstrated! And that the aim of a common Europe!
